

To whom it may concern

For the program director get to know the programmers to set up a schedule that would be best fitted for the direction the station is moving towards. I feel that since I'm easy going and I know many of the present e board members and members already. I would be great to show all newcomers how and to be a part of this great organization. I think that making sure that everyone has a standard level of understanding and working the equipment on their own is essential. I will take care of the application process and make sure all our newcomers are over satisfied with what we can do. I also what to give everyone a fair chance to shine. Help people find what department most suits them.

I think I have the best personal traits for the position. Not only am I already familiar with members I can use the positive to help complete tasks and become more involved in day to day activities with other members.

Knowing these individuals I will be better to develop a great schedule to help create that sound we are trying to implement . I have great relationships with other candidates for the other positions and I think I would be a great fit to getting us together into figuring out that sound. I will fulfill my duties as a program director to the letter.
